Live Stream

The API can be called with a simple http GET command. The commands can be performed from any browser. Third-party control systems (Crestron, AMX, Extron, etc.) can also make the required HTTP request.

API Live Stream

Start Live RTMP Main HDMI Push Stream
http://[ScorpionIP]/set_ctl?type=hdmi_main&rtmp_enable=1

Stop Live RTMP Main HDMI Push Stream
http://[ScorpionIP]/set_ctl?type=hdmi_main&rtmp_enable=0

The API returns "succeed" or fail.

There are many other settings possible, but the start/stop are the most commonly used. Contact DiscoverVideo for additional information.
