

Meeting Broadcaster

Meeting Broadcaster is an affordable and portable complete system for recording and distributing meetings on the web. It allows town and city governments, corporations, healthcare organizations, and schools to record video and audio with supporting documents and place it on their webpage for anyone to view on-demand. Recordings can be divided into sections permitting viewers to select the segment they want to watch.

Meeting Broadcaster Applications:

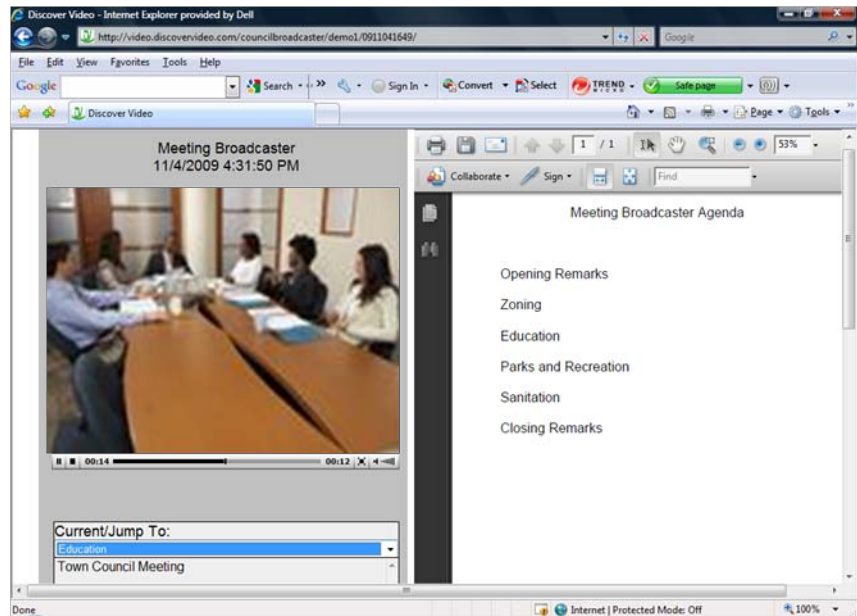

- Town and City government meetings
- Board of Education meetings
- Corporate meetings and conventions
- College and University lectures and events
- Hospital/healthcare organization meetings

Meeting Broadcaster Benefits:

- Permit residents to view town/city meetings on-demand with PCs and Macs
- Attach any documents for review during the playback of the meeting
- Segment meeting recordings into agenda items
- Affordable price for complete package
- Saves time and money
- Simple to use
- Reliable – works every time
- Portable system (easy to transport to any location)

Meeting Broadcaster Package:

- Windows Media video encoder appliance
- Meeting Broadcaster software
- Internet streaming service
- Internet video and document storage
- Web based training and on-line help
- Viewing webpage with your logo and organization information

An added benefit of the Meeting Broadcaster system is live webcasting. Discover Video provides the components for streaming any meeting or event live on the Internet to anyone, anywhere. Meeting Broadcaster includes a Windows Media streaming/recording appliance, Internet streaming service, Internet video storage service, and a viewing webpage.

Once recorded any meeting can be accessed on the web from PCs, Macs, and mobile devices. Simple navigation allows anyone to watch the portion of the meeting that interests them, without having to watch the entire meeting.

Meeting Broadcaster is ideal for organizations with tight budgets. It has a low initial price and can be subscribed to on a monthly or yearly basis. We provide flexible hosting plans to meet any budget.
