DV EXPRESS

OVERVIEW

The Discover Video DV Express system is a compact live and on-demand video portal for small enterprises. It's perfect for schools, colleges, and corporate departments. Easy to use by staff and IT departments. Use your existing IP network to broadcast your live programming to up to 1,000 simultaneous viewers.

MOBILE, DESKTOP & TV VIEWING

Use any device to watch any live or on-demand video. View stunning high definition live video, and enjoy instant easy navigation of video on demand. With the DV Set Top Box, watch any content on any TV.

COMPACT VERSATILE DESIGN

The DV Express is a self-contained, low cost, fully automatic, streaming server and media management system. It is ideal for enterprises that need secure video streaming, digital signage, or a Priority Alert notification system.

DIGITAL SIGNAGE

DV Express includes a Digital Signage System to deliver video, images (PowerPoint or Google Slides), RSS feeds, text, webpages, or emergency information to an unlimited number of TV monitors. Each end station can have unique content which makes DV Express great for any organization. The administrator, using a simple web-based control panel, can create dynamic digital signs from any location.

ADDITIONAL FEATURES

Any recorded video in DV Express can be delivered as a podcast. Live video can be multicasted with an optional multicasting license.
