VIDEO CONTENT

Curriculum-Based Video Library Available With DEVOS System

Imagine offering your teachers an extensive video library of highest quality, PreK-12 educational videos designed to support the curriculum and engage students. That library is available today through Discover Video. Working with some of the best producers of educational content, we've compiled a library of award-winning, grade-level content designed to support the Common Core.

Library Features

Classroom Video Content is a constantly growing library currently featuring over 700 video titles in the areas of science, social studies, guidance, health, math and language arts. Most programs come complete with teacher's guides, activity sheets and assessment tools that can easily be adapted to any lesson plan. Spanish language titles are also available.

Easy Access and Functionality

With a few clicks users can find any desired video and support materials. Each video includes a detailed description, tags, and categories making it easy to find and obtain the content within seconds. Because the library is fully integrated with the Discover Video system it can be viewed on any device.

- Desktops
- Cell Phones
- Tablets
- Roku Boxes
- Digital Signage

The content is not just for use in the classroom. It can be viewed by students at home too. You can even add embedded questions to the videos and measure the results of assigned viewing.

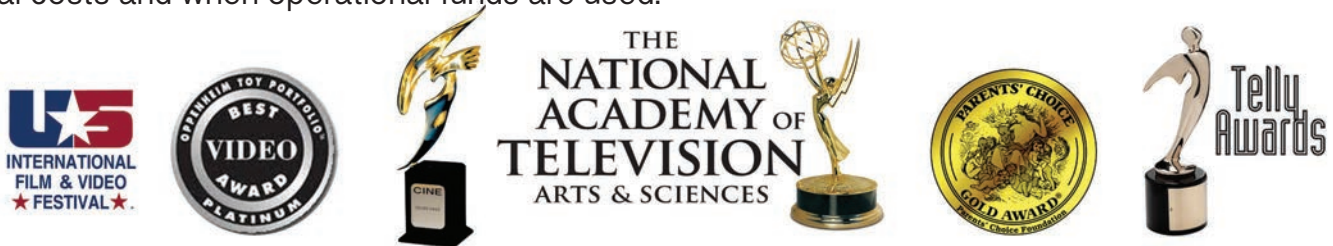

Quality and Up-To-Date Content

You won't find low-quality recordings of TV clips, amateur video, or actors with mullets in this library. There are no commercials, or commercial dropouts. You get over 700 original, high quality, fully vetted, well designed, HD videos and education content developed specifically for student learning.

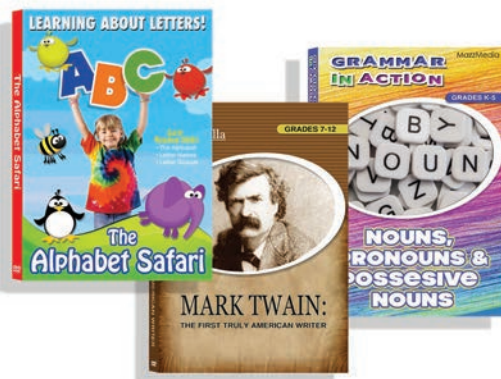

Increase value with option to purchase or subscribe. When you purchase the library, the content is yours, just as if you purchased 700+ DVDs and the licensing rights to new content at no additional cost. Your license allows the content to be used on the Discover Video system throughout your school system. Purchasing the library is often appropriate for new systems, grant-based purchases, and whenever future funds are in doubt.

A subscription to the library gets you the same original content and all the new releases, but at a lower initial cost. Subscribing to the library is often appropriate when there is a need to conserve on initial costs and when operational funds are used.

Award-Winning Video Collection

The quality of Classroom Video Content is indisputable. The collection is packed with award-winning content.

Here are some multi-video series in our library!
